Thank you for allowing Klaich Animal Hospital to provide care for your pet. It is our commitment to help your pet have a longer, happier life. Part of that commitment includes providing preventative care for our patients. Preventative care includes annual examinations and wellness lab work. Wellness lab work can lead to early detection of disease and allows our doctors to establish a baseline to track your pet's health from year to year. Please bring in a fresh fecal sample, as fecal testing and heartworm testing are included in the cost of the wellness lab work.

We look forward to seeing you and your pet. Please do not hesitate to reach out if you have any questions regarding your pet's appointment or preventative care.
